
A Frozen visual features
Support + mask
Query
Frozen DINOv2
Power transform + L2 normalization
B Shared-covariance GDA
μfg
μbg
Foreground
Background
Shared covariance Σ
Pooled estimate + ridge λI
$w = \Sigma^{-1}(\mu_{fg} - \mu_{bg})$
Estimate statistics from support features
C Posterior-guided prompts
Posterior
Point prompts
$P\left(fg \mid \tilde{f}_q\right) = \sigma\left(w^T \tilde{f}_q + b\right)$
Spatially diverse positive / negative points
D SAM + iterative correction
Frozen SAM
Final mask
Posterior vs. prediction
Extra positive / negative prompts
Iteratively correct false / missed regions
